VISIT OUR WEBSITE FOR ALL DETAILS ABOUT EQUIPMENT

InterElectronic Hungary Ltd. aims to support its partners in the market competition with the most modern electronic production equipment with the help of experts. We believe that advanced technology and reliable equipment are key to the success of the industry and we continuously strive to introduce the latest innovations.

PRODUCTS AND SERVICES

InterElectronic Hungary Ltd. offers a wide range of products, including the latest electronic manufacturing equipment and additional services:

- Automated SMT-THT production line solutions for efficient and precise production of electronic boards.
- High-quality SMT machines for fast and reliable component placement.
- Innovative THT hybrid inserting machines, forming and cutting equipment, selective soldering machines.
- Soldering systems Modern soldering technologies for perfect joints, furnaces, either vapour phase, vacuum...
- Advanced inspection and testing systems to minimise manufacturing defects, even with AI assistance.
- Maintenance and service Professional maintenance and repair services to ensure continuous operation.
- Consultancy and advice Expert support for optimising production processes and introducing new technologies.

INNOVATION AND QUALITY

InterElectronic Hungary Ltd. is committed to innovation and quality. We constantly monitor technological developments and our customers' needs to offer the best solutions. We work in close cooperation with our partners to provide tailor-made solutions.

SUSTAINABILITY AND RESPONSIBILITY

Sustainability and environmental awareness are important to our company. Energy is produced and used in an environmentally friendly and sustainable way. In all our activities, we strive to minimise our ecological footprint and support the cause of environmental protection. In our own offices and warehouse, we use solar panels and heat pumps for year-round zero-emission cooling and heating..

CONTACT

Visit our website for detailed information and contact us to help you shape the electronics production lines of the future!

InterElectronic Hungary Ltd. - Your partner in electronics manufacturing

The team at InterElectronic Hungary Kft. is ready to help you succeed with our expertise and innovative solutions. Contact us and discover how together we can make your manufacturing processes more efficient and effective!

ESD MAGAZIN RACKS

INTEON offers EDS magazin racks from plastic and metal construction with 100°C, 120°C and 200°C heat-resistant and different adjusting system.

DRY CABINETS

INTEON offers you Dry cabinet system for component storage. There are different models, even custom made solutions to find the best performance for your production if you are manufactured OEM or small repair service.

COMPONENT PREFORMING

INTEON offers cutting & bending machines for axial, radial and power components also with vibratory bowl feeders for loose components

WAVE SOLDERING

Wave soldering system/Dual wave/
